PROFESSIONAL SUMMARY

Full-stack engineer with hands-on experience delivering learning and tutoring products across React, Node.js, Express, MySQL, and AWS. Strong background in multi-role platforms, authenticated workflows, API development, and dependable delivery collaboration using Docker, Jenkins, Git, and Jira. Effective at translating product requirements into polished user experiences and maintainable backend systems.

CORE SKILLS

Frontend: React, Next.js, JavaScript, TypeScript, HTML, CSS, Tailwind CSS, Bootstrap

Backend: Node.js, Express.js, REST APIs, Sequelize ORM, JWT Authentication, Swagger

Databases: MySQL, MongoDB

Cloud and Delivery: AWS, Docker, Jenkins, CI/CD, Git, Linux

Collaboration: Agile/Scrum, Jira, Figma, cross-functional delivery, technical mentoring

PROFESSIONAL EXPERIENCE

Evangadi Tech -- 2021 - Present | Addis Ababa, Ethiopia

Full-Stack Engineer - Evangadi Academy *Learning platform | React, Node.js, Express, MySQL, AWS*

- Built and maintained product features for a learning platform supporting multi-batch course delivery, guided student progression, and internal academy operations.
- Developed and maintained backend services, authentication flows, and relational data models for course phases, learning materials, live sessions, certificates, and supplementary courses.
- Collaborated across frontend, backend, and design workflows using Jira, Git, and Figma to deliver reliable user-facing functionality.
- Supported Docker-based services, Jenkins pipelines, and AWS deployment workflows while improving maintainability through clean service patterns and query tuning.

Engineering Contributor - Evangadi Tutoring *Tutoring platform | React, Node.js, Express, MySQL, Socket.io*

- Contributed to a tutoring platform serving students, parents, tutors, and admins through structured role-based workflows.
- Implemented and maintained APIs and product flows for onboarding, scheduling, session materials, assessments, and live-session access.
- Worked on secure authentication and role-based access control using JWT patterns, protected routes, and maintainable backend logic.
- Supported platform reliability through documentation, testing, API organization, and operational safeguards for production-oriented workflows.

Instructor / Web Development Professional *Technical training and mentoring*

- Guided students through practical learning experiences covering React, Node.js, Express, and MySQL.
- Delivered hands-on exercises and real-world project support to strengthen job-ready development skills.
- Created a supportive learning environment focused on debugging discipline, clear fundamentals, and consistent growth.

SELECTED PROJECT

GitHub Intelligence Dashboard *Independent Project*

<https://github.com/ei-bro/github-search-user>

Stack: React, GitHub API, Chart.js, OAuth, Netlify

- Built a recruiter-friendly analytics dashboard that organizes GitHub profile and repository data into a clear searchable interface.
- Integrated API data with visual reporting to surface repository activity and contribution patterns in one place.
- Published the project with a public codebase and live deployment as a practical demonstration of frontend engineering and API integration.

EDUCATION

Bachelor of Science in Computer Science -- Hilcoe Technology Institute
